

The Blandford Series of Yarbrough Genealogical Records

Old Blandford Church, Petersburg, Virginia
{Richard Yarborough's grave marker is bottom center, above.}

Master Index – Part II (McClothin – Zotz)

Leonard Yarbrough, Editor

May 2017

About the Index

The indices for both the scanned and archived volumes were created by TExtract[®], a software package used by commercial book and document publishers. Among its many features is the ability to merge the individual chapter/volume indices into a composite master index. It is not, of course, an error-free software package, especially when the print quality of the original documents is poor. Nevertheless, the resulting indices are mostly error-free, with the exception of page numbering. The given page numbers in the indices refer to the actual "page count" number, not the number that may appear on a given page. In most instances, copying the name or term listed in the Index and pasting it into the search field (evoked by pressing CTRL + F) within the index file will find the page(s) where it appears. All the volumes of The Blandford Series of Yarbrough Family Records are searchable, to the extent permitted by the quality of the original material.

There are many names that appear to be corrupted/mis-spelled in the original documents. To the extent that it was possible to correct these names, this was done. However, many were essentially indecipherable, so they have been left as the indexing software rendered them.
